

Sample Medical Case Report

Patient Information

Patient Name: John Anderson
Age: 45
Gender: Male
Patient ID: P001

Chief Complaint

John Anderson visited the hospital with complaints of chest pain, shortness of breath, fatigue, and occasional dizziness.

Diagnosis

Dr. Sarah Williams diagnosed the patient with Hypertension and Type 2 Diabetes.

Diagnostic Tests

Blood Pressure Test, Blood Sugar Test, and ECG were performed. Blood pressure and fasting glucose were elevated. ECG was normal.

Medications

Amlodipine 5 mg once daily and Metformin 500 mg twice daily were prescribed.

Follow-up

The patient was advised to exercise regularly, reduce salt intake, follow a diabetic diet, monitor blood pressure weekly, and return after three months.
